SUMMARY

- Creative Director, AI Video Creator/Producer, and Frontend Developer & Designer with 7+ years of experience creating digital products, visual content, advertising experiences, and modern web applications.
- Experienced in creative direction, AI video creation and production, video editing, advertising video production, brand design, image creation and modification, web frontend development, and UI/UX design.
- Combines creative vision with strong technical expertise to take projects from initial concept and visual direction through production,development, editing, and final delivery.
- Experienced in using generative AI and modern creative tools to create cinematic videos, promotional content, branded visuals, characters, environments, and digital experiences. Also experienced in building responsive, high-quality frontend websites and applications using modern JavaScript and TypeScript frameworks.

PROFESSIONAL EXPERIENCE

Creative Director / AI Video Creator & Producer 2024.5 - Present

Mediam Rare | AI-Powered Brand Video Production Remote / Freelance

Technologies: AI image/video generation, Google Flow, Runway, Kling AI, Leonardo AI, OpenArt, Higgsfield, InVideo, Dreamina, Pixverse, HeyGen, Adobe Photoshop, Adobe Premiere Pro, After Effects, CapCut, Figma, HTML, CSS, JavaScript, React, TypeScript, Node.js, REST APIs, Git, and cloud-based development tools.

- Led the creative development and production of AI-powered promotional videos, branded visual content, and digital media projects from concept through final delivery.
- Designed and refined AI-generated images, characters, environments, storyboards, animations, and video sequences while maintaining visual consistency and brand identity.
- Directed video editing, compositing, motion design, sound synchronization, AI voice/lip-sync workflows, and final post-production for client-facing content.
- Collaborated with clients and creative teams to translate business requirements into engaging multimedia experiences and production-ready visual assets.
- Continue developing web applications and digital products alongside freelance multimedia and creative-technology projects.
- Build responsive full-stack applications and websites while integrating AI capabilities, third-party APIs, automation, and modern cloud services.

Video Creator & Producer / Full-Stack Developer 2021.5 – 2024.4

Shift Media | Interactive Multimedia & Digital Campaign Platform In Person > Remote

Technologies: TypeScript, JavaScript, React, Node.js, HTML5, CSS3, REST APIs, PostgreSQL, MongoDB, WebSockets, Git, Docker, AWS, Figma, Adobe Photoshop, Adobe Premiere Pro, After Effects, Moho and multimedia production tools.

- Combined multimedia production and full-stack software development to build interactive digital experiences, promotional websites, and video-driven campaigns.
- Produced and edited video content, motion graphics, digital imagery, and web assets while working closely with creative and technical teams.
- Developed responsive web applications and interactive interfaces, integrating multimedia content with backend services and third-party APIs.
- Participated in the complete development lifecycle, including requirements analysis, UI implementation, API development, testing, debugging, deployment, and ongoing optimization.

KEY STRENGTHS

Creative direction and visual storytelling.
